

# CERAMIC HEATER BANDS

## for Injection Machine Barrels.

### Increase Recovery Rates

Higher watt-densities improve plastic melt

### Mold at Higher Temperatures

Ideal for molding exotic engineered materials, achieve temperatures to 1400° F or more.

### Very Efficient 3-Way Transfer

These " electric furnaces" develop heat transfer by conduction, convection and radiation.

### Lower Energy Costs

Built-in insulation minimizes heat loss, keeps heat transferring to barrel.

### Longer Life

Unlike conventional mica bands, a tight fit on the barrel is not necessary. No hot spots are developed when the fit is loose or irregularities exist on the barrel.
