

# Linear Edge FILTER NOZZLE

## A must for all Hot Runner Molds

- Traps Foreign Material
- Protects Hot-Runner Mold Gates.

- Maximum Protection
- Minimum Pressure Drop

Thousands Sold Worldwide

Material flows into rear-ported helical grooves, over barriers into adjacent front-ported grooves. .010" gap between groove barriers and nozzle I.D. traps foreign particles.

Also provides mixing action.

Standard Size fits any modified MOLDERS CHOICE removable-tip nozzle  
Choose standard 316 Stainless Steel or long-wearing CPM9V Powder Metal Tool Steel.

Add Teeth for improved filtration and improved flow

**CALL for Details**

.020" to .050 teeth gap

**Two ways to buy:**

- A Filter only — modify your own nozzle (instructions included with filter).
- B Filter / Nozzle set — Purchased nozzle is machined to accept filter.
