

CHAIN / SLINGS

Versatile in Heavy Duty Applications

The proper selection, application, care and inspection of chain slings used in moving material by hoisting can produce efficient and economical handling operations with minimum hazard to persons and property.

Single Chain Slings

Double Chain Slings

Triple & Quad Chain Slings

How To order:

The following information should be given on orders or inquires for Registered chain slings.

1. **CHAIN SIZE:** This is specified by the size of the material from which the chain is made, determined by working load limit required.
2. **REACH:** This is the length, including attachments, measured from bearing point to bearing point.
3. **TYPE:** Select and specify proper type of sling.
4. **ATTACHMENTS:** Unless otherwise specified standard master links and hooks as given herein will be used, When other than standard master links and hooks are required, we should be given a complete description or a drawing of the requested substitute.
